

Divvy Out Method for Division Practice

$102 \div 3 =$

Using the divvy out method, we give each group small parts of 102 until they all have the same amount. Then, we add the quantities in one group to get the quotient or answer.

$20 + 10 + 4 = 34$

$\text{Therefore, } 102 \div 3 = 34$

Directions: Use the divvy out method to solve the problems. Show all your work.

$1. 54 \div 2 =$

27

$2. 141 \div 3 =$

47

$3. 236 \div 4 =$

59
